## PROJECTS

### VIZUALS - SEAMLESS VIDEO DISCOVERY

Developed 'Vizuals,' a ReactJS and Tailwind CSS-driven video streaming platform with dynamic content discovery using RapidAPIs. Empowered users to seamlessly search, watch, and explore personalized video recommendations. Showcased adeptness in front-end development, API integration, and user-centric design principles.

**Technology Used :**ReactJS, TailwindCSS, RapidAPIs

**Tools :** Visual Studio Code

### TENT CALCULATOR

This application caters to both tent house vendors and customers. Vendors can calculate the quantities of individual components, and customers can estimate tent costs based on length and breadth inputs. The streamlined process enhances efficiency for vendors and provides customers with a precise tool for accurate cost estimation.

**Technology Used :** HTML,CSS, JavaScript

**Tools :** Visual Studio Code

### FILE SYSTEM ORGANIZER

This application streamlines the organization of various file types, such as PDFs, audio, videos, executables, and more. Users can effortlessly categorize files within designated folders by providing the folder path. This automated process ensures efficient and structured file management.

**Technology Used :** NodeJs File System Module, Path Module, JavaScript

**Tools Used :** Visual Studio Code

## CAREER OBJECTIVE

Looking to establish a career in the field of Information Technology, I wish to work in a growth-oriented company and contribute to the development of the organization while upgrading my skill set and knowledge.
